

Type (Brown, Blue, Black)  
 Switch Appearance Type : Cylinder Type, Metal  
 Shell;Output Type : PNP NO(Normal Open);SensorDistance : 8mm;Supply Voltage : DC 10-30V  
 Output Current (Max) : 300 mA;Detect Object : Iron;Thread Diameter : 18mm/3/8NPT  
 Total Size : 65 x 30mm/ 2.5" x 1.2"(L\*D);Cable Length : 1.2m/4ft;External Material : Plastic, Metal  
 Color : Silver Tone, Blue, Black;Net Weight : 79g;Package Content : 1 x Proximity SwitchSome Parts

Order Quantity	Unit Price (USD/PC)	OKY3280-1
Sample(10-20pcs)	\$1.24	55g

Capacitive Proximity Sensor Switch 3Wire 3 Wire DC6-36V 10mm NPN DC NO 300mA LJC18A3-B-Z/BX  
 Description:  
 It is a component widely used in automatic control industry for detecting, controlling, and noncontact switching. When proximity switch is close to some target object, it will send out control signal.  
 The Proximity Sensor Switch is used for testing parts such as size and speed can also be used in frequency counters, frequency pulse generator, liquid level control and processing procedures for the automatic convergence.

LJC18A3-B-Z/BX DC 3-Wire Capacitor Proximity Sensor Approach Switch NPN		SKU NO.

Specification:  
 Model:NJK-5002C  
 Detection method: Inductive  
 Switch frequency: 320KHZ  
 Detective distance: 10mm/0.9inch  
 The length of the cable :110cm/43.31inch  
 Working voltage: DC6-36V  
 Output format: 3-wire NPN normally open  
 External Material: Plastic, Alloy

NJK-5002C 10mm Detecting Distance NPN DC6-36V Sensor 3-Wire NO Inductive Switch		SKU NO.

## Laser Sensor Module

Operating voltage	5V	Laser Sensor		SKU NO.
Wavelength	650nm	Order Quantity	Unit Price (USD/PC)	OKY3301
Pack Size	5cm x 4cm x 3cm	Sample(20-50pcs)	\$0.26	3g
power	5mW	51-100pcs	\$0.25	
Current	<40mA	101-1000pcs	\$0.24	
		1001-5000pcs	\$0.23	
Weight	3g	>5000pcs	\$0.23	

The GY-56 is a low cost digital infrared range sensor module.  
 Operating voltage 3-5v, small power consumption, small size, easy installation.  
 Its working principle is that the infrared LED emits light and is irradiated  
 After the object, the return light is received by the MCU and the MCU calculates  
 The difference in time, get the distance. Directly output the distance value.  
 This module, there are two ways to read data, namely

GY-56 infrared laser ranging module		SKU NO.
