

			>5000pcs	\$0.64	
	Operating Voltage Range	DC 5V	Correlation photoelectric Infrared correlation count sensor module		<b>SKU NO.</b>
	Chip	LM393, Correlation type infrared head	Order Quantity	Unit Price (USD/PC)	OKY3276
	Board Size	32mm*11mm *20mm	Sample(20-50pcs)	\$0.35	3g
			51-100pcs	\$0.34	
			101-1000pcs	\$0.32	
			1001-5000pcs	\$0.32	
			>5000pcs	\$0.30	

	<p>1, the use of imported slot optocoupler sensor, slot width 5mm.          2, the output status indicator, the output high-level lights off, the output low-level lights.          3, a block, the output high; no shelter, the output low.          4, the comparator output, the signal clean, good waveform, driving ability, more than 15mA.          5, the working voltage of 3.3V-5V          6, the output form: digital switch output (0 and 1)          7, with a fixed bolt hole, easy to install          8, small board PCB size: 3.2cm x 1.4cm          9, the use of wide voltage LM393 comparator</p>		IR Comparator Speed Sensor LM393 Module for Arduino Robotics RPM and More		<b>SKU NO.</b>
			Order Quantity	Unit Price (USD/PC)	OKY3276-1
			Sample(20-50pcs)	\$0.28	3g
			51-100pcs	\$0.27	
			101-1000pcs	\$0.26	
			1001-5000pcs	\$0.25	
			>5000pcs	\$0.24	

	This module is the intelligent car speed module! Adopt groove to shoot photoelectricity, as long as the opaque object passes through the groove can trigger (with the use of our shop car code plate) output 5V TTL level. Schmidt trigger used to shake pulse, very stable, can be used for car speed measurement, distance measurement and other applications!		Intelligent car speed measurement module		<b>SKU NO.</b>
